

3M Internal Correspondence

To: EHS&R Working Group
From: Georjean Adams
Subject: EHS&R Minutes for August 10, 1999
Date: August 31, 1999

Attendees: D. Bacon, L. Wendling, M. Santoro, W. Weppner, J. Sugg, C. Burton, T. DiPasquale, L. Zobel, D. Sanders. Guests: W. Reagan, M. Case, A. Seacat, G. Olsen.

Plant Exposure Assessment Study – Geary Olsen

- Geary Olsen presented the results of the recently completed assessment study conducted at the Decatur site. This will be published soon in a scientific peer-reviewed journal.
- C. Burton will propose a study to determine what the range of homologues may be in POSF.
- Medical surveillance will continue for metabolites.
- Annual training on FC issues will continue for plant employees.

Two Generation Repro Study – Marv Case

- Marv discussed the findings from the studies, including a cross-fostering study. A final report should be ready the end of Sept. Regulatory reporting obligations will be reviewed.
- EtFOSE, N-EtFOSE, PFOS – none are teratogens. Paper for publication is in preparation.

FC807/FC845 PK Reports – Andrew Seacat

- Andrew discussed the findings on pharmacokinetic adsorption and conversion to PFOS in the liver. Monoester > diester >> polymer.

“Metabolic Baselineing of Adipate Polymers” – Bill Reagen

- The request to analyze for metabolites of adipates in rats fed adipate polymers was approved.
