Subject: Re: Presentation of FC papers 

Perry,

I'd be very pleased to present with you. (Should you desire to incorporate the serum findings in your talk at the IH conference, that would be fine, too.) I saw Dave Sanders' note to you regarding we can't do anything without the core team's permission. This is so the lawyers try to control everything - except they can't in this case because if they deny the presentation of the results at your IH conference, it will also have to mean that they will deny publication of our findings in a scientific journal and that is not a smart thing to do given the FC issue. If we don't publish, publish and publish, others will fill this void in the next few years.

Geary

Subject: Presentation of FC papers

Geary,

Would you be interested in presenting your paper at the next International IH Conference? It will be in Orlando, FL at the end of May (or beginning of June). We could submit our papers as part I & part II. It would be much more valuable if both are presented in the same session.

If you are interested, please let me know ASAP. There is a deadline the second week of October for the conference.

Let me know!
Perry
