

Neil Pattell - director Exposure
group

Charlie Aver telephone call

4/10/2000

- reviewed 2-gen study - concerns
- value of NOAEL was concerning - 1 mg/kg I explained it should be
- effects "grew" in second generation (seen at lower doses?)

- would like progress statement until final report is sent → will go to hazard assessors
- focus on 1976 - on with summary of older studies

- what was known + when — as case goes forward Charlie will take time to think about this and document.

- focus on subchronic +

- use tiers of info for focus
- tier 2 tier 3 from kids program
- 2-gen repro
- cancer

- PFOA - submit as 2A — POFS et al + 2B — PFOA

Keep separate

Exhibit
1664

State of Minnesota v. 3M Co.,
Court File No. 27-CV-10-28862

3MA00470824

1664.0001

use key study
concept.

Use Exposure Info Profile

UEIP forms from SIDS cases
basic categories release
use consumer workers

- Exposure information
- Monitoring data
- Analytical protocols

- Critical thing is for EPA to see info.

- More critical focus is on environmental

- Human exposure info

repro
developmental - rabbit

Teratology

PK

metabolism

subchronic - less important
human monitoring
