Re: Oakdale Pump-out System Discharge Fluorochemical Sampling

Dear Mr. Rys:

As we discussed, 3M has collected a water sample from the Oakdale site groundwater pump-out system discharge on August 11, 2004. 3M then collected confirmatory samples on September 17, 2004.

The pump out system was operating under normal conditions during both sampling events. The samples were collected from sanitary sewer manhole #2, located approximately 50 feet southwest of the pump house. Exygen Research, located in State College, PA, performed sample analysis. Sample results from both events are summarized in the attached table. Please note that sample results are similar for both events.

If you have any questions or need additional information, please contact me at (651) 778-5344.

Sincerely,

Todd Fasking
