Re: **TSCA Section 8(e) Supplemental Submissions:
Docket Nos. 8EHQ-1180-373 and 8EHQ-1180-374**

Dear Sir/Madam:

3M Company ("3M") requests that EPA redesignate, to the TSCA Section 8(e) docket, three studies which 3M previously submitted to EPA and are presently contained in "For Your Information" (FYI) docket number 1378 (also known as AR-226). These studies and information supplement 3M's previous 8(e) submissions in Docket Numbers 8EHQ-1180-373 and 8EHQ-1180-374.

Attachment One lists the three studies for which 3M requests redesignation. We have endeavored to include sufficient identifying information to facilitate the redesignation, including date of study submission; study title; study date; study type; and chemical. These studies consist of a range finding rat teratology study on one fluorochemical and two eye irritation studies on fluorochemical mixtures containing di-ethyl glycol butyl ether; these data are consistent with information already included in the TSCA Section 8(e) docket or in the published literature for these or related compounds, but 3M has concluded these data may not be, strictly speaking, "corroborative" of previously reported or published information as defined in EPA's reporting guidance.

3M appreciates EPA's attention to this matter. Please do not hesitate to contact the undersigned if you have any questions or require further information regarding this submission.

Very truly yours,

Dr. Katherine E. Reed, Ph.D
Executive Director
3M Environmental Technology
And Safety Services
